LETTER RE RESTART

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

In connection with the above-identified application, an Office Action was issued on March 31, 2005. Upon review of the Office Action, it was found that the Examiner erroneously cited Mikurak as "US 6,606,704." Upon a telephonic request from our office on May 2, 2005, the Examiner provided the correct patent number of which is --US 6,606,744--.

BEST AVAILABLE COPY

A copy of the Office Action is attached for your reference. It is therefore respectfully requested that the Patent Office restart the period to respond.

Respectfully submitted,

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

call device (nurse-call button). It is inherent in Chaco that the system includes attribute information, as broadly recited, for example, the location of the patient.

14. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Chen (US-5553609) in view of Mikurak (US-6606794).

Chen lacks means for executing a program to prepare a market trend investigation report and for sending the report to a manufacturer "or the like."

Mikurak teaches collecting data and preparing trend reports (Fig.20) for use in evaluating the level and quality of service in the service industry.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Chen to include means for executing a program to prepare a market trend investigation report and for sending the report to an appropriate party, like a service quality management review team, such as taught by Mikurak, in order to analyze the data and determine the level and quality of service provided by the home health care service.

15. Claims 12 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chen (US-5553609).

Chen discloses an indoor network rather than a power supply network including a feed control line.

Vizard teaches using a power supply network and feed control line developed by AT&T.
